OKESOLA FRANCIS AYOMIDE

Frontend-Heavy Full-Stack Developer

Ushafa, Bwari, FCT, Nigeria
| +234 916 809 4827 | francisokesola@gmail.com | GitHub | Portfolio

PROFESSIONAL SUMMARY

Results-driven Frontend-focused Full-stack Developer with experience building responsive, accessible web applications using HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, and Next.js. Skilled in translating UI/UX designs into performant, reusable components, with experience in serverless architectures and secure OAuth authentication. Proficient in integrating tools such as Stripe, Neon PostgreSQL, and Better Auth. Passionate about writing maintainable code and contributing effectively in collaborative environments.

TECHNICAL SKILLS

HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), Typescript, React.js, Next.Js, Git, GitHub, Stripe, Better Auth, Neon Postgres db., Netlify, Vercel, Responsive Design, DOM Manipulation, Web Accessibility, Debugging, UI/UX Principles, UI interpretation, API integration.

PROJECT EXPERIENCE

Trendlama Store – Full-Stack E-Commerce Web Application[*Link*]

TypeScript · Next.js · Tailwind CSS · Vercel

- Built a fully responsive clothing store with a modern, polished UI using TypeScript and Next.js, ensuring type safety and scalable code architecture.
- Implemented a dynamic shopping cart with real-time item management, quantity controls, and persistent cart state across sessions.
- Developed a multi-step checkout page with form validation, order summary display, and a post-purchase success/confirmation page.
- Leveraged Next.js App Router for optimised page routing, server-side rendering, and fast page load performance.
- Deployed to Vercel with continuous deployment from GitHub for seamless production updates.

Rings and Styles Jewelry Store – Full-Stack E-Commerce Web Application [*Link*]

TypeScript · Next.js · Tailwind CSS · Neon POSTGRESQL · Stripe · Better AUTH · Vercel

- Developed a full-stack e-commerce web application using Next.js
- Integrated Neon PostgreSQL for efficient database management
- Implemented Stripe for secure payment processing
- Configured Better Auth for social and email-based authentication
- Built using a serverless architecture for scalability and performance
- Implemented cookie-based session management to persist user progress across sessions
- Delivered a seamless, secure, and user-friendly experience

Dazzle Fashion – Frontend Web Application[*Link*]

HTML · CSS · JavaScript · React.js · Netlify

- Built a fully responsive fashion brand website with a clean, modern UI that works across all screen sizes and devices.
- Architected reusable React components, improving code scalability, maintainability, and developer experience.

- Implemented interactive UI features including filtering, smooth animations, and dynamic content rendering.
- Deployed seamlessly to Netlify with continuous integration from a GitHub repository.

Classic Watches Store – E-Commerce Frontend[*Link*]
HTML · CSS · JavaScript · Stripe

- Designed and built a clean, responsive product catalogue interface optimised for mobile-first browsing.
- Managed product data using Stripe's product dashboard, products were created and stored in Stripe then imported into the project via the Stripe API, ensuring a single source of truth for pricing and inventory.
- Implemented product display cards, a shopping cart UI, and intuitive navigation for a smooth user experience.
- Applied best-practice CSS layouts (Flexbox/Grid) to ensure consistent rendering across browsers.

Auth System – Secure Authentication Application[*Link*]
TypeScript · Next.js · Better Auth · Neon PostgreSQL

- Built a full authentication system using Better Auth, supporting both social logins (Google, GitHub) and traditional email/password authentication.
- Integrated Neon PostgreSQL as the serverless database to securely store and manage user records and session data.
- Implemented automatic user profile updates on login — syncing display name, avatar, and account metadata from OAuth providers on each session.
- Handled protected routes and session management to ensure only authenticated users can access restricted pages.
- Followed security best practices including hashed credentials, secure session tokens, and environment-variable-based secret management.

EDUCATION

Bachelor of Technology (B. Tech) — Chemical Engineering Graduated: March 2024

Ladoke Akintola University of Technology (LAUTECH), Ogbomoso, Oyo State

Experience

Web Development Intern

Haqqman Technologies — February 2026 – Present

- Assisted in building and maintaining responsive web applications
- Collaborated with team members to implement UI/UX designs
- Wrote clean, maintainable, and reusable code using modern web technologies
- Supported integration of APIs and backend services
- Participated in testing, debugging, and performance optimization

ADDITIONAL INFORMATION

- Currently expanding skills in TypeScript and Next.js App Router to stay current with industry trends.
- Comfortable working independently and in collaborative, remote-friendly team environments.
- Quick learner with a growth mindset — actively building projects and contributing to open source.
- Fluent in English (written and spoken); strong written communication skills for documentation and code comments.
